HABIBUR RAHMAN

MERN Stack Developer · AI-Powered Web Applications

habib.bd.dev@gmail.com | +880 1752-652462 | github.com/habiburrahman63 | Remote · Worldwide
Portfolio: habibur-rahman-lovat.vercel.app | Linkedin: linkedin.com/in/habibur-rahman-793127420

PROFESSIONAL SUMMARY

MERN stack developer who has delivered 15+ full-stack web applications for international clients, from secure Node.js/Express REST APIs to accessible, mobile-first React interfaces. Optimizes MongoDB data models and aggregation pipelines (up to 55% lower query latency) and secures APIs with JWT, bcrypt and role-based authorization. Uses AI-assisted development, prompt engineering and LLM API integration to ship faster while holding to production standards for code quality, security and testing. Seeking remote full-stack or frontend roles.

TECHNICAL SKILLS

Frontend	React.js, Redux Toolkit, React Router, Tailwind CSS, Framer Motion, WCAG AA accessibility
Backend	Node.js, Express.js, RESTful API design, JWT authentication, bcrypt, authorization middleware (RBAC)
Database	MongoDB, Mongoose, aggregation pipelines, indexing, query optimization
Integrations	Cloudinary, payment gateways, social authentication (OAuth)
DevOps	CI/CD automation, Vercel (frontend), Render (backend)
AI & Automation	AI-assisted development, prompt engineering, LLM API integration, workflow automation

PROFESSIONAL EXPERIENCE

Full-Stack MERN Developer (Freelance)
2023 – Present

Independent client engagements · International clients

- Designed, built and deployed **15+ full-stack web applications** and React single-page apps for international clients.
- Built secure REST APIs with **JWT authentication, bcrypt password hashing** and custom role-based authorization middleware.
- Reduced backend query latency by **up to 55%** by tuning MongoDB aggregation pipelines and indexes.
- Delivered mobile-first interfaces with Tailwind CSS and Framer Motion that meet **WCAG AA** accessibility standards.
- Applied AI-assisted development (scaffolding, debugging, documentation, query and security review) and integrated LLM APIs for features such as chatbots, content generation and smart search, reviewing all output before release.

Frontend & API Engineer
2022 – 2023

Web application projects

- Built dynamic single-page applications with React, Redux Toolkit and React Router.
- Integrated third-party services including Cloudinary image transformations, payment gateways and social login.
- Automated CI/CD workflows, deploying frontends to Vercel and backends to Render.

EDUCATION

Diplopma in Computer Science & Engineering
Sirajganj Institute Of Tecnology (SIT)

Graduated with Honors

Coursework: Data Structures, Algorithms, Software Engineering, Database Systems, Web Technologies

CERTIFICATIONS

- Full-Stack Web Development with MERN & Next.js Specialization
- Modern React & Redux Toolkit Architecture Certification
- Node.js, Express & MongoDB Production Backend Mastery
- Advanced REST API Design & Security Standards
